are you dropping your O's ?

Your Building Supply Officer now has the solution to this problem -- SHEETS OF CLEAR THIN PLASTIC TO BE PLACED OVER THE STENCIL IN YOUR TYPEWRITER. This STENCIL FILM prevents the cutting out of letters, eliminates type fill, produces clearer stencil copies. Its dull finish reduces glare. One sheet of STENCIL FILM can be used about 4 times.

Before you start cutting your next stencil, ask your Building Supply Officer for a supply of PLASTIC STENCIL FILM. You'll be amazed at:

- BETTER STENCIL COPIES than you've had before
- REDUCED TYPE-CLEANING TIME

This idea paid its suggester \$20. Have you any methods improvement ideas? Send them to the Suggestion Awards Staff.
